Subject: RE: UCSF PRA 020-107

Hello, Mr. Alexander – good afternoon. I hope this finds you well.

In further response to PRA 020-107, attached hereto is the next in the rolling series of productions responsive to the request for records related Advanced Bioscience Resources.

These documents are a reproduction of the original record with redactions. Redactions have been applied to the names and location information of researchers and staff pursuant to California Government Code sections 6254(k) and 6255. The names and locations of researchers and staff do not shed any light on the work of the University, whereas the potential harm to UCSF employees could be quite great. Redactions have been applied to the secure site URL and internal procurement codes pursuant to California Government Code section 6255. UCSF has been the victim of numerous cyberattacks over the last 12 months – the secure URL and accounting code information do not shed any light on the work of the University, whereas the potential that hackers could use the information to probe for system weaknesses as part of their continuing attacks on UCSF could be quite great.

I estimate the next production of records related to Advanced Bioscience Resources on or before Friday 7/30/21
