December 22, 2014

Dear Valued Research Enthusiast,

As ABR begins another year of service, we take great pride in providing quality services in connection with the procurement of human organs and tissues for medical and scientific research. We gratefully acknowledge that together, our combined efforts may produce lasting benefits for the future health and welfare of the world's population.

We recognize the importance of your work in research and strive to maintain our high standards for you. In order to be able to continue providing such services, we must modestly increase our service fees, effective January 1, 2015. A revised fee schedule for standard research tissue is enclosed for your files.

ABR has an additional service for the cGTP acquisition of human fetal tissues, which ABR has been performing since 2007, for the potential use in GMP manufacturing of cell lines. ABR is an FDA-registered establishment for human cells, tissues, and cellular and tissue-based products (HCT/Ps). If you have an interest in acquiring human fetal tissues in compliance with the cGTP regulations of 21 CFR Part 1271, please contact us so that we may answer your questions and explain the process in detail.

We appreciate you and sincerely thank you for your continuing work in scientific and medical research, as well as for your continuing patronage to ABR. Any comments or suggestions which would enhance the quality of our work are always welcome.

We wish you the very best in the New Year and beyond!

Sincerely yours,

Linda Tracy

Linda K Tracy, RN, CTBS
President
